

Rebuild green surface in current location - rebuild and reshape the left greenside bunker and create a grass swale behind the green

Rebuild right fairway bunker and expand the bunker going left to improve visibility from the tees

Remove 2 fairway bunkers

Build a new green - expand the overall size of the green towards the natural area on the right, rebuild the front right greenside bunker, create new greenside chipping area between the front greenside bunker and new back right greenside bunker and expand the left greenside chipping area

Rebuild green surface in current location - raise the back section of the green surface, rebuild back right greenside bunker, rebuild and expand the width of left greenside bunker, expand the fairway approach going left into the start of the left greenside bunker and a new back greenside chipping area

Rebuild green in current location - expand the green going back left towards the pond, rebuild the front right greenside bunker, add a new back greenside bunker and expand the right greenside chipping area

Remove the part of the hedge along the pond

Install additional trees

Add a new left fairway bunker

Install a large tree

Rebuild right 2 fairway bunkers and increase the size

Rebuild middle right fairway bunker and remove the other 2 bunkers

Add additional trees and palm trees in the left rough

Rebuild green surface in current location - raise the back right section of the green, rebuild the left greenside bunker, add a new front left greenside bunker, remove the front right greenside bunker and create fairway approach in that location, rebuild the right greenside bunker and add a new back right greenside chipping area

Golf Course Master Plan

for

South Course Holes #10 - #18

Remodeling Plan by Rees Jones, Inc.

Date: December 20, 2017

Scale 1" = 200'

Rebuild fairway bunker and expand the bunker going left

Install additional trees

Rebuild and expand existing bunker

Remove far left fairway bunker and install large tree

Add new right fairway bunker

Rebuild the green in current location - expand the green going forward and along the back edge, remove left corner of the green, add a new right greenside bunker, rebuild the front left greenside bunker, remove the back right greenside bunker and create a new left and back left greenside chipping area

Rebuild the left fairway bunkers, create one large bunker and remove the far left bunker

Rebuild the 1st 2 fairway bunker and create one large bunker

Remove cordgrass

Install additional trees

Rebuild and expand existing bunker

Remove far left fairway bunker and install large tree

Add new right fairway bunker

Install additional trees

Lower the mound and rework the approach

Add new fairway bunker, built in existing mounds

Rebuild left carry bunker and expand going right, remove the 2nd left fairway bunker and create fairway in that location

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left carry bunker and expand going right, remove the 2nd left fairway bunker and create fairway in that location

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Remove 2 fairway bunkers

Build a new green - expand the overall size of the green towards the natural area on the right, rebuild the front right greenside bunker, create new greenside chipping area between the front greenside bunker and new back right greenside bunker and expand the left greenside chipping area

Rebuild green surface in current location - raise the back section of the green surface, rebuild back right greenside bunker, rebuild and expand the width of left greenside bunker, expand the fairway approach going left into the start of the left greenside bunker and a new back greenside chipping area

Rebuild green in current location - expand the green going back left towards the pond, rebuild the front right greenside bunker, add a new back greenside bunker and expand the right greenside chipping area

Remove the part of the hedge along the pond

Rebuild the left fairway bunker and add new bunker

Remove far right fairway bunker and install large tree

Install additional trees and palm trees in the right rough

Install new right fairway bunker and minor reshaping along the right edge of the fairway

Rebuild and expand the carry bunker

Rebuild green surface in current location - expand the green going back and raise the front section a small amount, rebuild the front left greenside bunker and remove the back left greenside bunker and replace with greenside chipping area

Expand the fairway before the bunker

Rebuild left carry bunker and expand going right, remove the 2nd left fairway bunker and create fairway in that location

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left carry bunker and expand going right, remove the 2nd left fairway bunker and create fairway in that location

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left carry bunker and expand going right, remove the 2nd left fairway bunker and create fairway in that location

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left carry bunker and expand going right, remove the 2nd left fairway bunker and create fairway in that location

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left carry bunker and expand going right, remove the 2nd left fairway bunker and create fairway in that location

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left carry bunker and expand going right, remove the 2nd left fairway bunker and create fairway in that location

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left carry bunker and expand going right, remove the 2nd left fairway bunker and create fairway in that location

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left carry bunker and expand going right, remove the 2nd left fairway bunker and create fairway in that location

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left carry bunker and expand going right, remove the 2nd left fairway bunker and create fairway in that location

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left carry bunker and expand going right, remove the 2nd left fairway bunker and create fairway in that location

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Build a new green - expand the overall size of the green towards the natural area on the right, rebuild the front right greenside bunker, create new greenside chipping area between the front greenside bunker and new back right greenside bunker and expand the left greenside chipping area

Rebuild green surface in current location - raise the back section of the green surface, rebuild back right greenside bunker, rebuild and expand the width of left greenside bunker, expand the fairway approach going left into the start of the left greenside bunker and a new back greenside chipping area

Install additional trees

Expand the fairway going left

Install a large tree

Install a cluster of palm trees

Remove the bunker

Expand the fairway before the bunker

Rebuild left carry bunker and expand going right, remove the 2nd left fairway bunker and create fairway in that location

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left carry bunker and expand going right, remove the 2nd left fairway bunker and create fairway in that location

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left carry bunker and expand going right, remove the 2nd left fairway bunker and create fairway in that location

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left carry bunker and expand going right, remove the 2nd left fairway bunker and create fairway in that location

Rebuild left fairway bunker and slide the bunker towards the pond and change the shape

Rebuild left carry bunker and expand going right, remove the 2nd left fairway bunker and create fairway in that location

Build a new green surface - slide the green towards the pond and expand the green into the location of the old right greenside bunker, add a new right greenside bunker and create a swale behind the green

Remove bunker complex and replace with large tree

Install a cluster of palm trees

Install a large tree

Expand the fairway going left

Remove the bunker

Install a cluster of palm trees

Rebuild green in current location - raise the back section of the green surface, add a new front right greenside bunker, expand the fairway approach going left and rebuild the left greenside bunker, remove the back bay of sand and expand the bunker towards the tees

Rebuild green in current location - raise the back section of the green surface, add a new front right greenside bunker, expand the fairway approach going left and rebuild the left greenside bunker, remove the back bay of sand and expand the bunker towards the tees

Align the tee to the green

Build a new green surface - slide the green towards the pond and expand the green into the location of the old right greenside bunker, add a new right greenside bunker and create a swale behind the green

Remove the last 2 fairway bunkers and create fairway
